Comments

DRUG.CLASS	COMMENTS
PI	
NRTI	D67N is a non-polymorphic TAM associated with low-level resistance to AZT.
	K219E/Q/N/R are accessory TAMS that usually occur in combination with multiple other TAMS.
NNRTI	K103T is an extremely rare non-polymorphic mutation that appears to confer intermediate/high-level resistance to NVP but it has little if any effect on EFV susceptibility.
