PR comments

Other

- T74S is a PI-selected accessory mutation that is polymorphic in most non-B subtypes.
- V82I is a highly polymorphic mutation that is not selected by PIs. It is the consensus amino acid in subtype G viruses.

No drug resistance mutations were found for PI.

RT comments

Other

- V179I is a polymorphic mutation that is frequently selected in persons receiving ETR and RPV. However, it has little, if any, direct effect on NNRTI susceptibility.

No drug resistance mutations were found for NRTI.

No drug resistance mutations were found for NNRTI.
